**DETAILED ACTION**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Matyjaszewski et al, U. S. Patent 5,807,937.

Reference to Matyjaszewski et al specifically teaches the claimed process with the monomers claimed and teaches the incorporation of OH groups at the ends of the polymer chains (see column 27) as well as the reaction of these groups (see column 39). The claimed polymers and compositions are, therefore, anticipated by the reference to Matyjaszewski et al.
